Fall Foods

Written by Harriet Rosenbloom

www.readinga-z.com

Which foods are ripe in the fall?

Pears are ripe in the fall.
We bite them.

Apples are ripe.
We pick them.

Beets are ripe.
We pull them.

Potatoes are ripe.
We dig them.

Cabbages are ripe.
We chop them.

Pumpkins are ripe.
We find them.

So many foods are ripe in the fall.
Let's eat!
