Hawaii Volcanoes National Park

Two famous volcanoes are in the park.

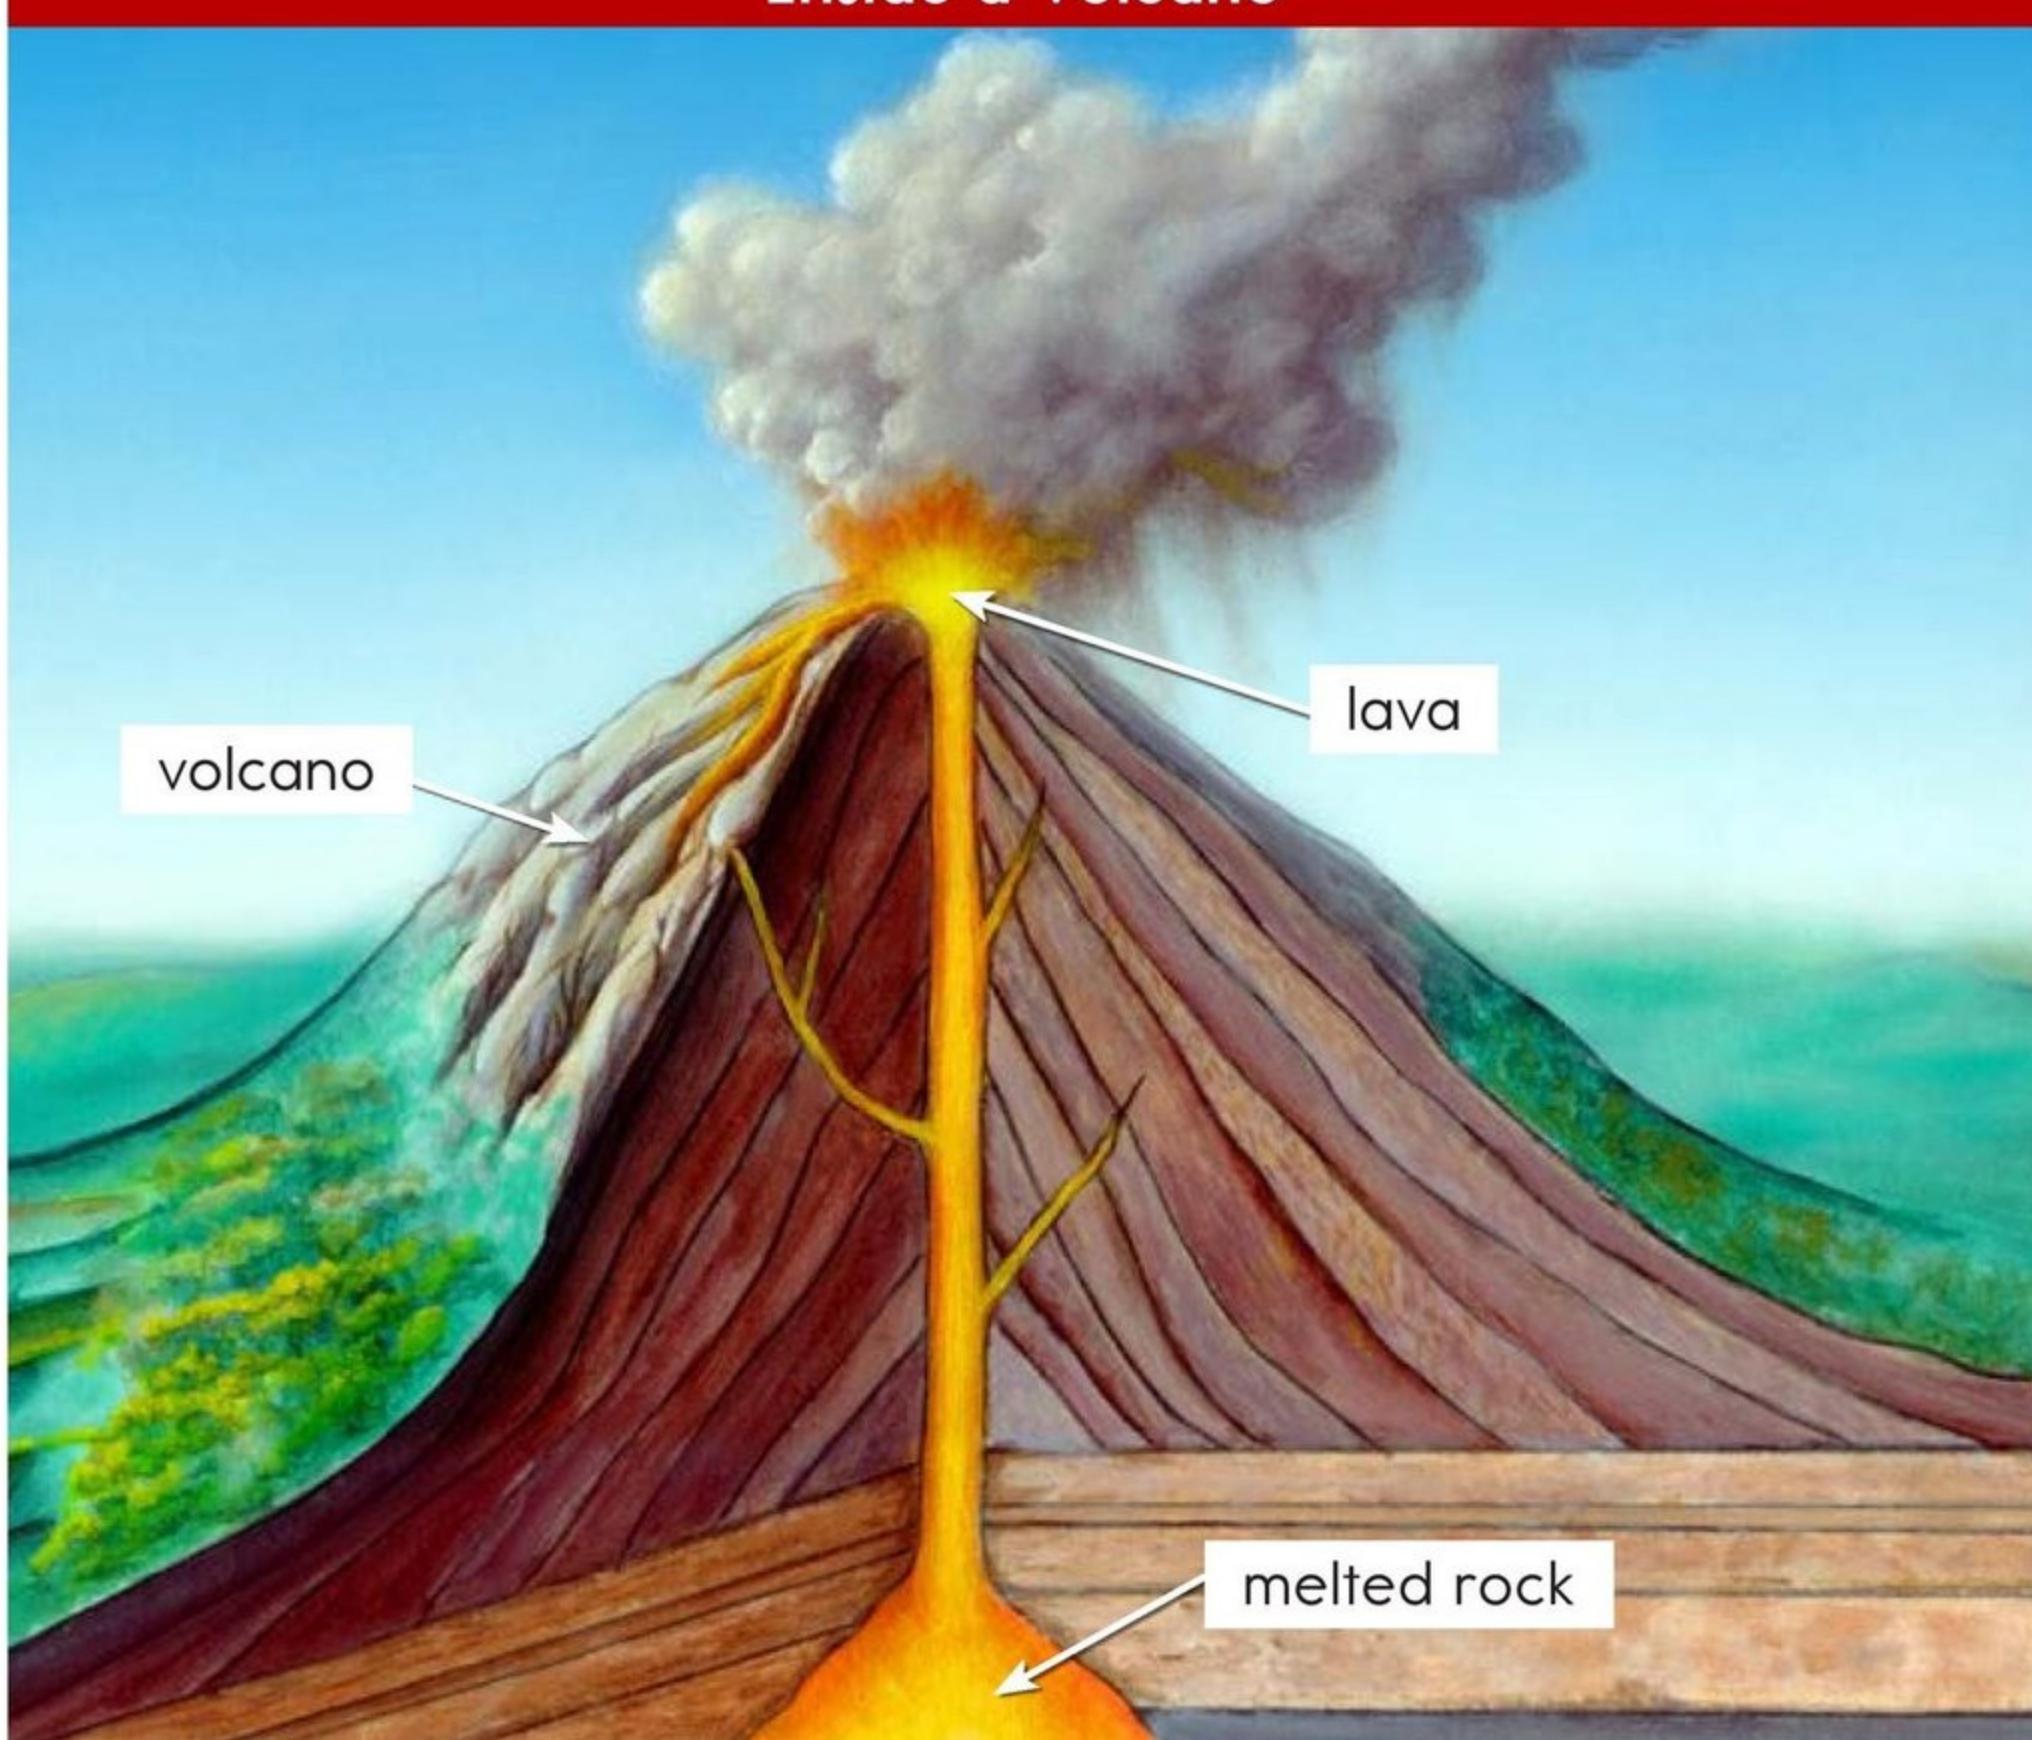

A Volcano Wonderland

Hawaii Volcanoes National Park

is on an island in Hawaii.

A national park is **protected** land.

Inside a Volcano

Volcanoes Form a Park

A volcano begins with hot, **melted** rocks deep in the Earth.
The rocks push up through the ground.

Then the rocks cool.
Over time, the rocks build up into volcanoes.

Kilauea volcano

Mauna Loa volcano

Two special volcanoes are in Hawaii
Volcanoes National Park.

A river of lava flows from one volcano.

One volcano in the park
is very **active**.

Leaping Lava

In 1959, one volcano shot lava higher in the air than the Eiffel Tower!

One of the park's volcanoes seen far away is covered in snow.

Another volcano in the park
is very big.

A lava lake sits at the top of one volcano in the park.

An Amazing History

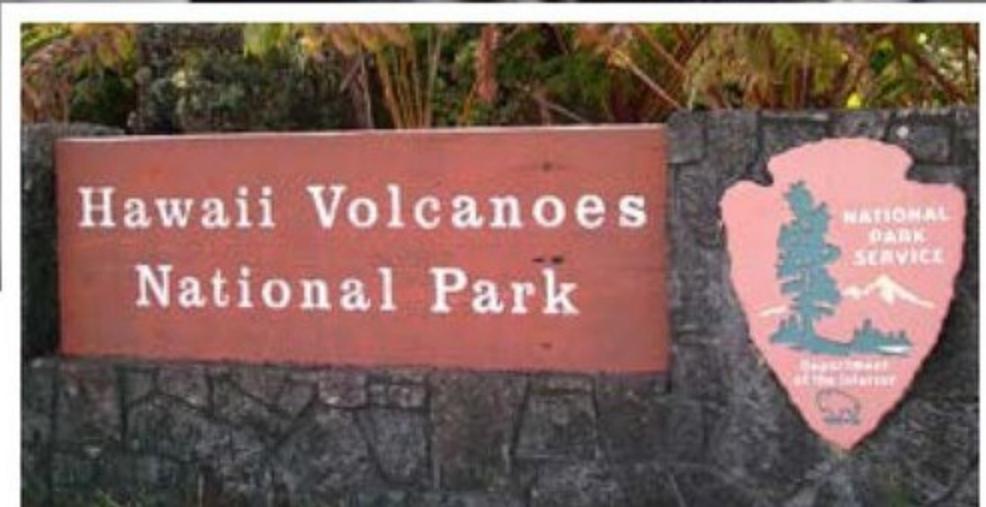

Hawaii Volcanoes National Park

is 520 square miles (1,347 sq km).

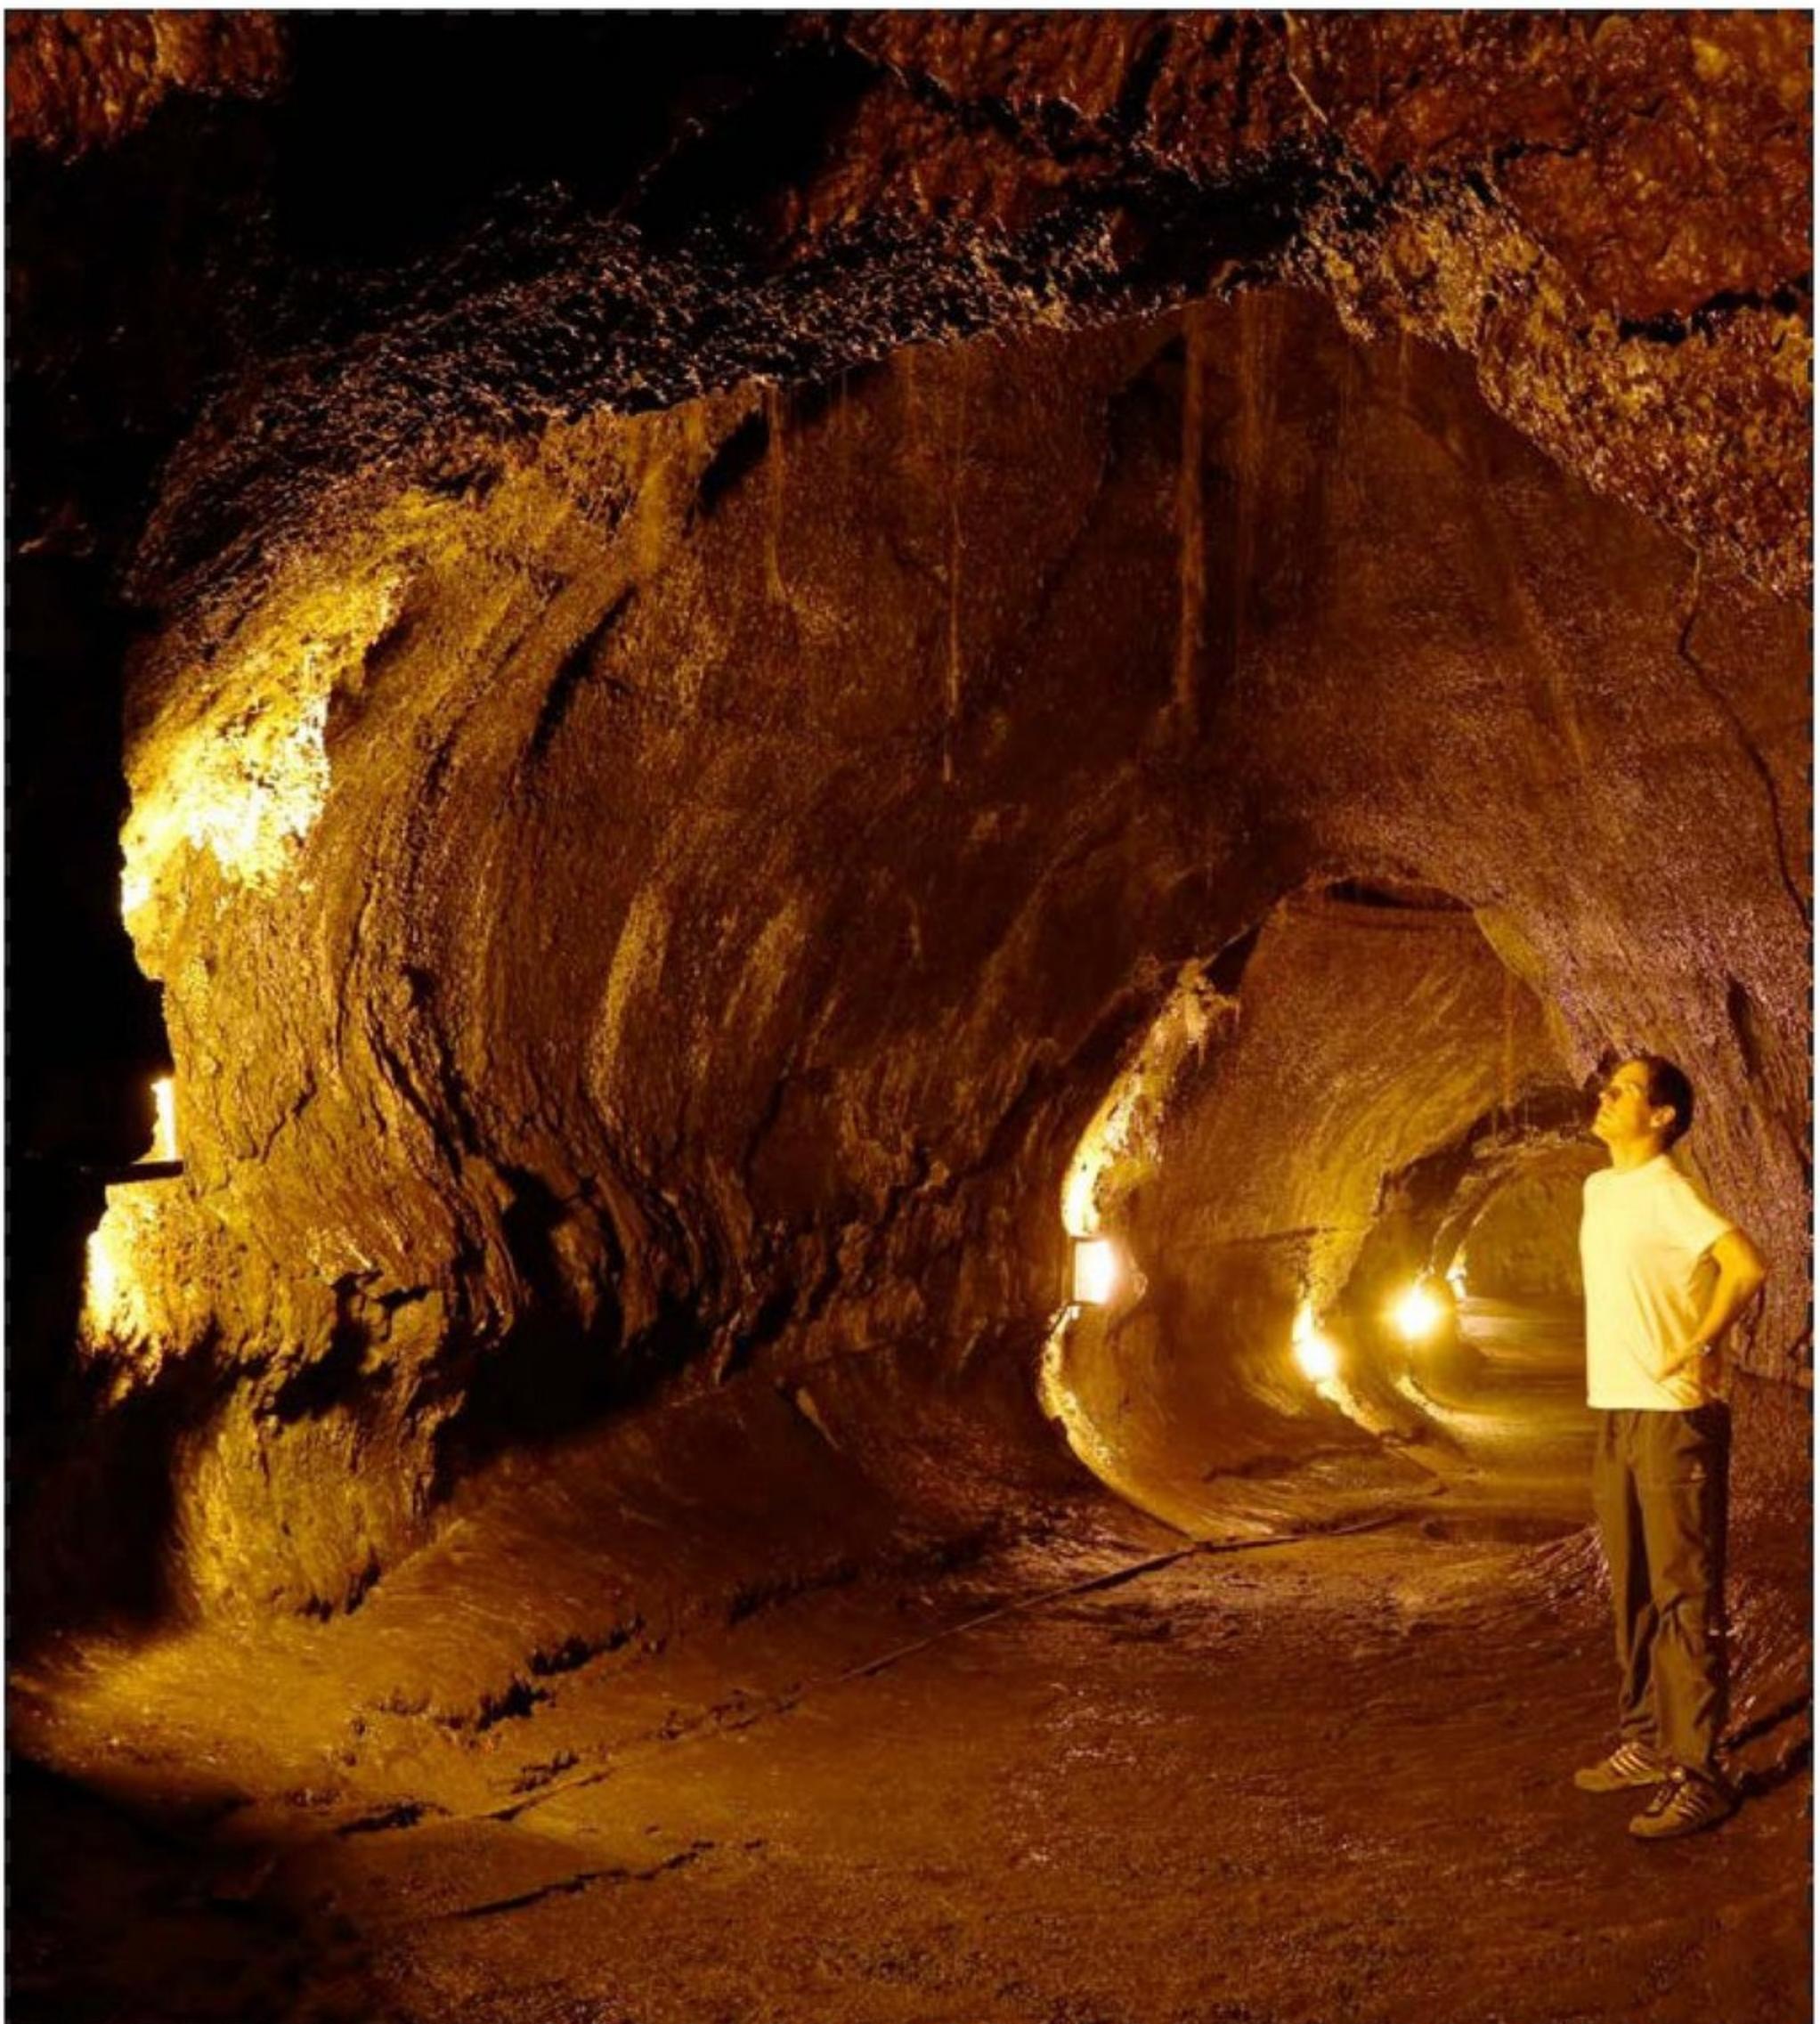

People have come to see the
volcanoes for a long time.

President Woodrow Wilson made the land a national park on August 1, 1916.

The land became a national park in 1916.

A visitor walks through a lava tube in the park.

There are volcanoes
and **lava** tubes.

Lava tubes are big **tunnels**
under the ground.

People can walk through them.

Wildlife at the Volcanoes' Edge

Hundreds of animals are protected in the park.

ohia lehua tree

mamane

fern

silversword

Hundreds of plants are protected in the park.

The park is home to beautiful forests.

Enjoy—But Watch Your Step!
People can hike or camp
in the park.

Visitors see the park change before their eyes.

When the volcanoes are active,
parts of the park close.
Hawaii Volcanoes National Park
is fun to visit.

Glossary

active (adj.) in a state of activity (p. 7)
